Incident Management Policy

1. Purpose

- The purpose of the Incident Management Policy is to ensure that any incidents that affect the daily operations of the organization are managed through an established process.

2. Scope

- **This policy applies to Imperative Business Ventures Pvt. Ltd. related to activities that cause or require resolution to incidents. Therefore, the scope of the Incident Management Policy includes the following:**
    1. All IT-supported locations
    2. All environments subject to the Incident Management Policy determined by the IT security Committee
    3. Vendor owned Incidents under IT service provider management
    4. Vendor/Partner owned Incidents under Vendor management
    5. IT service provider owned but Vendor supported Incidents

3. Incident Management Guidelines

- Guidelines for incident management operations section defines the guidelines for recording, classifying, prioritizing, and communicating with IT stakeholders.

Guidelines to Decide Urgency

- **Urgency of incident is based on classification of incident as:**
    - **Critical –** stoppage / disruption of processing services
    - **Normal –** which will not result in stoppage but need to be addressed to prevent stoppage
    - **Low –** which can be resolved without disruption in processing

4. SOP / Guidelines for Incident Management

When any incident is reported which is considered as affecting the IT systems of IBVPL, the following steps will be undertaken:

- Reporting of incident to IT department via mail
- Recording incident in Incident Management register with details like date of incident, description of incident, location, reported by
- Identifying relevant Support Personnel for incident handling
- Investigating / ascertaining Root Cause of incident and preparation of root cause analysis
- Gathering of systems / operational impact details
- Preparation of affected systems restoration plan
- Reporting to senior management on incident details
- Records documenting past incidents, inclusive of information security breaches, shall be diligently maintained

- BFL shall be promptly notified of any incident affecting the availability or security of BFL data, systems, or services. Notification shall be executed within 24 hours from the point of incident identification
- An established mechanism shall be in operation to facilitate employee reporting of information security incidents via dedicated email addresses or contact numbers
- Undertaking of service / systems restoration by identified support personnel by using appropriate software and any other required tools
- Preparation of incident report
- Review the incident and implement procedures for avoidance, if not already in place
- Information security incidents and data breaches shall be promptly communicated to all internal and external stakeholders as delineated within the policy document

Contact Details for Reporting:

• Mail Id – infosec.pune@theimperative.in

• Mobile – 7709086003

5. Disciplinary Policy

Initial Investigation

- When an information security breach is suspected or reported, the incident response team initiates an initial investigation to determine the nature and scope of the breach.

Assessment of Severity

- The severity of the breach is assessed based on the impact on confidentiality, integrity, and availability of information assets.
- Breaches are categorized into different levels of severity (e.g., low, medium, high) based on predefined criteria.

Identification of Responsible Party

- The individuals or teams responsible for the breach are identified through the investigation process.
- The investigation seeks to establish whether the breach was intentional or unintentional, and whether it was caused by negligence or malicious intent.

Documentation

- Detailed documentation of the incident, including findings from the investigation, is prepared.
- Documentation includes evidence gathered, actions taken, and recommendations for preventing similar breaches in the future.

Notification

- The individuals responsible are notified of the findings of the investigation and the disciplinary process that will follow.

Disciplinary Action

- Disciplinary action is taken in accordance with the severity of the breach and the organization's policies.

- Possible disciplinary actions may include:
  - Verbal or written warnings for minor breaches or first-time offenses
  - Suspension from work for serious breaches pending further investigation
  - Termination of employment for repeated or severe breaches, or breaches involving malicious intent

Appeals Process

- Employees who are subject to disciplinary action have the right to appeal against the decision.
- An appeals process is in place to ensure fairness and transparency.

Communication

- The outcome of the disciplinary action is communicated to all relevant stakeholders, including the incident response team, management, and HR.

Training and Awareness

- Training and awareness programs are conducted to educate employees about the importance of information security and the consequences of breaching security policies.

Review and Continuous Improvement

- The incident management policy and disciplinary process are periodically reviewed and updated to reflect changes in technology, regulations, and organizational requirements.
- Lessons learned from security breaches are used to improve security controls and prevent future incidents.

6. Policy Review

- The Incident Management Policy will be reviewed every 12 months by specified IT Admin personnel for incorporation of new guidelines or modifications to existing guidelines or processes and changes updated in Document Control Sheet.
