Logical Access Management Policy

1. Introduction

This policy outlines the procedures and guidelines for logical provisioning within IBVL. It establishes a structured workflow where access requests are initiated by the Human Resources (HR) department, reviewed by an administrative department, and implemented by the Information Technology (IT) department. The policy aims to ensure efficient and secure provisioning of logical access to systems and data, in alignment with organizational objectives and regulatory requirements.

2. Overview of Logical Provisioning

Logical provisioning refers to the process of granting and managing access to digital resources, such as systems, applications, and data, based on predefined roles and permissions. In this workflow, HR serves as the initiator of access requests, while an administrative department acts as an intermediary for review and validation before forwarding requests to the IT department for implementation.

3. Policy Statement

- Access to digital resources within the organization shall be initiated by HR through the designated access request process.
- An administrative department shall be responsible for reviewing and validating access requests before forwarding them to the IT department.
- The IT department shall implement approved access requests promptly and efficiently, following established procedures.

4. Process Overview

- **Initiation by HR:** HR personnel shall initiate access requests on behalf of employees using the designated access request form, providing necessary details such as employee information, access requirements, and justification.
- Review by Administrative Department: Access requests received from HR shall be reviewed and validated by the administrative department to ensure compliance with organizational policies and procedures. Any discrepancies or additional information required shall be communicated back to HR for clarification.
- Submission to IT Department: Upon approval by the administrative department, access requests shall be forwarded to the IT department for implementation. IT personnel shall execute the provisioning of access according to the approved specifications within a reasonable timeframe.
- Provisioning and Deprovisioning Procedures: IT shall ensure the provisioning of access is carried out securely and promptly, adhering to established access control measures. In case of employee role changes, transfers, or departures, IT shall promptly update access permissions or deactivate accounts as necessary.
- Documentation and Record Keeping: HR, administrative, and IT departments shall maintain accurate records of access requests, approvals, and provisioning activities for auditing and compliance purposes.

5. Roles and Responsibilities

- HR Department: Responsible for initiating access requests on behalf of employees and providing necessary information to facilitate the provisioning process.
- Administrative Department: Responsible for reviewing and validating access requests, ensuring compliance with organizational policies and procedures.
- IT/Security Department: Responsible for implementing approved access requests promptly and securely, maintaining appropriate access controls, and updating access permissions as needed.
- Employees: Responsible for adhering to organizational policies and procedures related to access to digital resources, providing accurate information to HR for access requests, and promptly reporting any access-related issues or concerns.

6. Access Request Form

An access request form template shall be provided to HR for initiating access requests. The form shall include fields for employee information, access requirements, justification, and any other relevant details.

7. Approval Workflow

- Initiation by HR: HR personnel shall initiate access requests on behalf of employees using the designated access request form, providing necessary details such as employee information, access requirements, and justification.
- Review by Administrative Department: Access requests received from HR shall be reviewed and validated by the administrative department to ensure compliance with organizational policies and procedures. Any discrepancies or additional information required shall be communicated back to HR for clarification.
- Submission to IT Department: Upon approval by the administrative department, access requests shall be forwarded to the IT department for implementation. IT personnel shall execute the provisioning of access according to the approved specifications within a reasonable timeframe.
- Provisioning and Deprovisioning Procedures: IT shall ensure the provisioning of access is carried out securely and promptly, adhering to established access control measures. In case of employee role changes, transfers, or departures, IT shall promptly update access permissions or deactivate accounts as necessary.
- Documentation and Record Keeping: HR, administrative, and IT departments shall maintain accurate records of access requests, approvals, and provisioning activities for auditing and compliance purposes.

8. Security Considerations

Access control measures shall be implemented and maintained by the IT department to ensure the confidentiality, integrity, and availability of organizational digital resources.

9. Training and Awareness

HR, administrative, and IT personnel shall receive training on the logical provisioning process, including their respective roles and responsibilities. Additionally, employees shall be made aware of access-related policies and procedures through regular communication and training initiatives.

10. Compliance and Auditing

The logical provisioning process shall comply with relevant regulatory requirements and undergo regular audits and reviews to ensure effectiveness and adherence to established policies and procedures.

11. Policy Review and Revision

This policy shall be reviewed annually to ensure its relevance, effectiveness, and alignment with organizational objectives. Any necessary revisions shall be made following an established review process.

12. Policy Acknowledgment

All employees shall be required to acknowledge their understanding and compliance with this policy upon joining the organization and periodically thereafter.

13. Enforcement

Non-compliance with this policy may result in disciplinary action, up to and including termination of employment, in accordance with organizational policies and procedures.
