Server Backup Policy

1. Purpose

The purpose of this Server Backup Policy is to establish procedures for safeguarding data, ensuring business continuity, and protecting against data loss due to system failures, cyber threats, or human errors.

2. Scope

This policy applies to all servers managed by [Company Name], including on-premises and cloud-based servers. It covers all critical data, applications, and configurations.

3. Backup Types & Frequency

- **Full Backup:** Performed monthly to capture the entire system and data.
- **Incremental Backup:** Performed daily to store changes made since the last backup.
- **Differential Backup:** Performed mid-week to store changes made since the last full backup.
- **Real-time Replication:** Implemented for mission-critical systems.

4. Backup Storage and Retention

- **Primary Storage:** Backups will be stored on secure, high-capacity storage systems.
- **Offsite Storage:** Encrypted copies will be maintained at a secure, geographically distant location.

5. Backup Security

- **Encryption:** All backups will be encrypted using industry-standard encryption protocols.
- **Access Control:** Only authorized personnel can access backup data.
- **Integrity Checks:** Regular checksum validation to ensure backup integrity.

6. Backup Testing & Restoration

- Backups will be tested at least once per quarter.
- A detailed restoration process will be documented and followed.
- Periodic disaster recovery drills will be conducted.

7. Responsibilities

- **IT Department:** Ensures compliance with this policy, performs backups, and manages restoration.
- **Data Owners:** Identify critical data and communicate retention requirements.
- **Security Team:** Ensures that backup security measures are followed.

8. Compliance & Review

- This policy will be reviewed annually and updated as needed.
- Non-compliance may result in disciplinary actions.
