System Allocation Policy – Support Staff

1. Purpose

The purpose of this SOP is to define the process for allocating systems and resources to support staff within Imperative Business Venture Pvt Ltd. This ensures that all support staff receive the necessary tools and access to perform their duties efficiently.

2. Scope

This procedure applies to all support staff within Imperative Business Venture Pvt Ltd. who require system access as part of their job responsibilities. It covers the allocation of hardware, software, and access permissions.

3. Definitions

- **System:** Refers to any computer hardware, software, or network resource required by support staff.
- **Support Staff:** Employees or contractors providing technical or administrative support services.
- **Allocation Request:** A formal request for system allocation, including hardware, software, or access permissions.

4. Responsibilities

- **IT Department:** Responsible for evaluating, approving, and implementing system allocations. Manages hardware, software installations, and user access configurations.
- **Support Staff Manager:** Responsible for identifying system needs and submitting allocation requests.
- **HR Department:** Coordinates with IT to ensure that system allocations align with job roles and responsibilities.

5. Procedure

5.1 Request Submission

1. **Initiation:** Support Staff Manager identifies the need for system allocation (hardware, software, or access permissions) and completes the System Allocation Request Form.
2. **Form Submission:** Submit the completed form to the IT Department through [specified submission method, e.g., email, internal ticketing system].

5.2 Request Review

1. **Initial Assessment:** IT Department reviews the request for completeness and verifies that the requested systems align with job responsibilities.
2. **Approval:** The IT Department evaluates the request based on availability and need. The Support Staff Manager may be consulted if additional information is required.
3. **Informed:** The IT Team sends the staff system allocation mail to our Partner Team (CC Governance Support Team).

5.3 System Allocation

1. **Hardware Allocation:**
    - **Inventory Check:** Verify the availability of the requested hardware in inventory.
    - **Configuration:** Prepare and configure the hardware (e.g., computers, peripherals) as per organizational standards.
    - **Distribution:** Provide the hardware to the support staff member and ensure proper setup.
2. **Software Allocation:**
    - **License Verification:** Ensure that sufficient licenses are available for the requested software.
    - **Installation:** Install and configure the software on the allocated hardware.
    - **Access:** Provide login credentials and necessary access permissions.
3. **Access Permissions:**
    - **Role-Based Access:** Assign permissions based on the support staff's role and job requirements.
    - **Account Creation:** Create user accounts and configure access settings as required.

5.4 Documentation and Training

1. **Documentation:** Record all allocated systems and access permissions in the IT asset management system.
2. **Training:** Provide necessary training or documentation to the support staff on how to use the allocated systems.

5.5 Review and Feedback

1. **Feedback Collection:** Obtain feedback from the support staff regarding the allocation process and any issues encountered.
2. **Process Improvement:** Review feedback and make necessary adjustments to the allocation process to improve efficiency.
